

bizhub PRO 1050

2005 PICK OF THE YEAR

BUYERS LABORATORY INC.

Purpose built, for the rigors of the production environment. That's what people have been saying about Konica Minolta's bizhub PRO 1050. They've been talking about its blazing 105-ppm output and workhorse 1,500,000-page monthly duty cycle. Its "big-iron" performance in smaller footprint at lower cost. Its 0.5 mm registration accuracy, production finishing capabilities, roll-out stacker units and powerful built-in PCL print controller.

Now Buyers Laboratory Inc., the leading independent office equipment test lab for more than 40 years, has awarded the bizhub PRO 1050 its "Pick of the Year" designation as Outstanding Multifunctional Imaging System in high-volume Segment 6.

And that's not all. BLI also honored Konica Minolta with its 2005 Award for "Multifunctional Product Line of the Year." Among the factors they considered were reliability, connectivity, output quality, ease of use and productivity — all essential elements in the bizhub PRO design philosophy.

Think what all these professional benefits can do for your production print output:

- ▶ **High-Speed Output** – 105 ppm, with reliability you can count on
- ▶ **Air-Assist Paper Feed** – To keep sheets separated for smooth throughput
- ▶ **Multi-Feed Detection Sensor** – To minimize downtime from paper jams
- ▶ **Built-in Print Controller** – PCL print/scan productivity, optional PS 3
- ▶ **Fast, Flexible Scanning** – To Email, FTP, PC, HDD, SMB
- ▶ **Powerful PageScope software** – For managing documents and devices.
- ▶ **High Maximum Paper Capacity** – 9,000-sheet input, 10,000-sheet output
- ▶ **Professional Finishing** – 200-page booklet-making, 6 folding options
- ▶ **Ease of Operation** – Large LCD screen, simple user-friendly menus
- ▶ **Simitri® Polymerized Toner** – For enhanced image detail and definition

Power up your print production — call today for a demonstration!
